

TEMPUR-CANADA POLICY

## TEMPUR-PEDIC® SWEDISH MATTRESS™ USE & CARE INSTRUCTIONS

### TEMPERATURE SENSITIVE

The Tempur-Pedic® Swedish Mattress™ is sensitive to temperature, with even one degree changing the feel. Below 15.6°C (60°F), the Tempur-Pedic mattress becomes firmer, but at body temperature, it becomes quite pliant, moulding itself to the body's shape. **If your Tempur-Pedic Swedish Mattress is delivered during the winter months, please be sure to allow the mattress time to acclimatize to room temperature before moving.** Tempur-Pedic products should be kept at room temperature for best results. Prolonged or repeated exposure to conditions of extreme heat and/or extreme cold can affect the pressure relieving properties. Do not place Tempur-Pedic® products in direct sunlight.

### ELECTRIC BLANKETS AND HEATING PADS

Due to the temperature sensitivity of the TEMPUR® material, electric blankets and heating pads should never be used with the Tempur-Pedic Swedish Mattress. Contact with these items can impair the unique properties of the TEMPUR material.

### MATTRESS FOUNDATION

The Tempur-Pedic Swedish Mattress requires a new Tempur-Pedic foundation, platform or other solid level surface. Other types of non-firm surfaces will allow the mattress to sag, affecting the pressure relieving properties of the TEMPUR material.

### REMOVABLE MATTRESS COVER (NOT STANDARD ON ALL MATTRESSES)

If your mattress cover is removable, it is zippered on four sides for easy removal and washing. We recommend use of an industrial-size washing machine and dryer for the Tempur-Pedic Mattress Cover as many home machines are not large enough to accommodate the cover properly. The following procedure should be followed when washing the cover:

1. If the mattress cover is designed to be removable, unzip the top portion from the non-slip bottom portion, which should remain under the mattress. If the mattress cover is stitched, it is not intended to be removed or washed, and doing so will void your warranty.
2. Wash only the unzipped, top portion of the mattress cover. **The TEMPUR material should never be washed.**
3. Set washing machine on gentle cycle.
4. Use cold / cool water only.
5. Use mild or gentle detergent.
6. Machine dry on low, removing cover damp and allowing to air dry during final stage.
7. Line / air drying is recommended
8. **DO NOT USE CHLORINE BASED PRODUCTS OR HARSH STAIN REMOVERS OF ANY KIND.**

## TEMPUR-CANADA POLICY

### **TEMPUR-CANADA APPROVED MATTRESS PROTECTORS:**

#### **(i) PROTEX-IT® AND/OR ADVANCED PERFORMANCE MATTRESS PROTECTOR**

To experience the full pressure-relieving effect of the TEMPUR material, use only the TEMPUR-Canada approved Protex-It® or the Advanced Performance Mattress Protectors and/or your standard bed sheets. **The Protex-It and the Advanced Performance Mattress Protectors are machine washable with the Protex-It having a maximum temperature of 95°C and 70°C respectively for the Advanced Performance Mattress Protector. DO NOT USE BLEACH.** Machine dry on low setting or air dry. Not intended for incontinent use.

### **ADJUSTING TO A NEW TEMPUR-PEDIC SWEDISH MATTRESS**

Like any new mattress, it may take sometime to become accustomed to the unique feeling of your new Tempur-Pedic Swedish Mattress.

### **IMPROVED CIRCULATION**

One of the benefits of pressure-relief is improved circulation. Some people may find themselves feeling warmer because of the improved circulation. We suggest that if you notice this affect that you use one less cover at night. Fewer covers also allow for a more relaxed sleep.

### **TEMPORARY MANUFACTURING SMELL**

All polyurethane materials have a smell when new. This is temporary and completely harmless.

### **CHEMICAL CONTENT**

Tempur-Pedic products **do not** contain polybrominated diphenyl ether (PBDE), chlorofluorocarbons (CFC), formaldehyde chemicals or any other chemicals that are harmful to consumers. Our products meet fire safety requirements without using PBDE chemicals.

**Tempur-Pedic mattresses feature a one-sided design and should never be flipped.**
