

TEMPUR CANADA POLICY

TEMPUR-PEDIC® MATTRESS USE & CARE INSTRUCTIONS

TEMPERATURE SENSITIVE

The Tempur-Pedic Swedish Mattress™ is sensitive to temperature, with even one degree changing the feel. Below 15.6°C (60°F), the Tempur-Pedic mattress becomes firmer, but at body temperature, it becomes quite pliant, moulding itself to the body's shape. **If your Tempur-Pedic mattress is delivered during the winter months, please be sure to allow the mattress time to acclimatize to room temperature before moving.** Tempur-Pedic products should be kept at room temperature for best results. Prolonged or repeated exposure to conditions of extreme heat and/or extreme cold can affect the pressure relieving properties. Do not place Tempur-Pedic® products in direct sunlight.

ELECTRIC BLANKETS AND HEATING PADS

Due to the temperature sensitivity of the TEMPUR® material, electric blankets and heating pads should never be used with the Tempur-Pedic Mattress. Contact with these items can impair the unique properties of the TEMPUR material.

MATTRESS FOUNDATION

The Tempur-Pedic Swedish Mattress requires a new semi-flex foundation, platform or other solid level surface. Other types of box springs or non-firm surfaces will allow the mattress to sag, affecting the pressure relieving properties of the TEMPUR material.

REMOVABLE TERRY VELOUR MATTRESS COVER

The anti-microbial mattress cover on the following mattresses is zippered on four sides for easy removal and washing:

- The OriginalBed by Tempur-Pedic™
- The ClassicBed by Tempur-Pedic™
- The DeluxeBed by Tempur-Pedic™

We recommend use of an industrial-size washing machine and dryer for the Tempur-Pedic Terry Velour Mattress Cover as many home machines are not large enough to accommodate the cover properly. The following procedure should be followed when washing the cover:

1. Unzip the top portion of the mattress cover from the non-slip base portion, which should remain under the mattress.
2. Wash only the unzipped, top portion of the mattress cover. **The TEMPUR material should never be washed.**
3. Set washing machine on gentle cycle.
4. Use cool water only.
5. Use mild or gentle detergent.
6. Machine dry on low, or allow to air dry.
7. Remove from dryer damp, and allow to air dry during the final stage.
8. **DO NOT USE CHLORINE BASED PRODUCTS OR HARSH STAIN REMOVERS OF ANY KIND.**

TEMPUR CANADA APPROVED MATTRESS PROTECTORS:

(i) PROTEX-IT™ MATTRESS PROTECTOR

To experience the full pressure-relieving effect of the TEMPUR material, use only the TEMPUR Canada approved ultra-lite Protex-It waterproof mattress protector and/or your standard bed sheets. **The Protex-It mattress protector is machine washable up to 95°C. DO NOT USE BLEACH.** Machine dry on low setting or air dry. Not intended for incontinent use.

(ii) TEMPUR-Med® PREMIUM WETSAFE MATTRESS COVER

The Tempur-Med® Premium Wetsafe Mattress Cover can be wiped clean with standard institutional disinfectants (germicidal, tuberculocidal and fungicidal) *according to the disinfectant cleaning directions*. The TEMPUR-Med Premium Wetsafe Mattress Cover can also be cleaned with mild soap and water. Alcohol based products may also be used, and will not damage the cover by drying and cracking. This cover is intended for incontinent use.

ADJUSTING TO A NEW TEMPUR-PEDIC® MATTRESS

Like any new mattress, it may take sometime to become accustomed to the unique feeling of your new Tempur-Pedic Mattress.

IMPROVED CIRCULATION

One of the benefits of pressure-relief is improved circulation. Some people may find themselves feeling warmer because of the improved circulation. We suggest that if you notice this affect that you use one less cover at night. Fewer covers also allow for a more relaxed sleep.

TEMPORARY MANUFACTURING SMELL

All polyurethane materials have a smell when new. This is temporary and completely harmless.

CHEMICAL CONTENT

Tempur-Pedic products **do not** contain polybrominated diphenyl ether (PBDE), chlorofluorocarbons (CFC), formaldehyde chemicals or any other chemicals that are harmful to consumers. Our products meet fire safety requirements without using PBDE chemicals.

NEVER NEEDS TURNING

Unlike conventional spring mattresses, the Tempur-Pedic Mattress never needs to be “flipped” or “turned”. You may turn the mattress from head to foot if desired. The Tempur-Pedic Mattress has a base layer of high density polyurethane with a top layer of the TEMPUR material.
