

TEMPUR-CANADA POLICY

## TEMPUR-PEDIC® SWEDISH PILLOWS USE AND CARE INSTRUCTIONS

### TEMPERATURE SENSITIVE

Tempur-Pedic® Swedish Pillows™ are sensitive to temperature and humidity, with even one degree changing the feel. In an environment of 15.6°C (60°F) or less, the pillow will become somewhat firmer. However, it will readily warm and respond to your body temperature. For best results, keep pillows at room temperature.

### ELECTRIC BLANKETS & HEATING PADS

Due to the temperature-sensitivity of the TEMPUR® material, we do not recommend using an electric blanket or heating pad with your pillow. Prolonged contact with these items can impair the unique properties of TEMPUR pressure-relieving material.

### CARE OF THE REMOVABLE TERRY-VELOUR PILLOW COVER

We recommend a cold temperature setting for machine washing and a cool setting for machine drying. Air-drying is best. Do not “over-dry” the cover. **Never wash the TEMPUR material.** The following procedure should be followed when washing the cover:

1. Unzip the pillow cover.
2. Wash only the pillow cover. **The TEMPUR material should never be washed.**
3. Set washing machine on gentle cycle.
4. Use cool water only.
5. Use mild or gentle detergent.
6. Machine dry on low, or allow to air dry.
7. Remove the cover from dryer damp, and allow to air dry in the final stage.
8. **DO NOT USE CHLORINE BASED PRODUCTS OR HARSH STAIN REMOVERS OF ANY KIND.**

### TEMPORARY MANUFACTURING SMELL

Tempur-Pedic Swedish Pillows may have a slight temporary manufacturing smell remaining from our unique manufacturing process. All polyurethane-based materials have this characteristic. This is temporary and completely harmless. This smell will dissipate in a few days.

### CHEMICAL CONTENT

Tempur-Pedic products **do not** contain PBDE (polybrominated diphenyl ether), CFC's (chlorofluorocarbons), formaldehyde chemicals or any other chemicals that is harmful to consumers. Our products meet fire safety requirements without using PBDE chemicals.
